DEVELOPING INNOVATIVE THERAPIES THAT ADDRESS THE SOURCE OF DISEASE, NOT JUST THE SYMPTOMS

Our discovery and development platforms for drug and cell-based therapies allow us to both create and retain significant value within our therapeutic franchise areas of cancer and inflammatory diseases. Scientists and physicians at Celgene are the driving force behind our success, enabling target-to-therapeutic platforms that integrate both small-molecule and cell-based therapies.

Product Pipeline ›
Celgene invests significant resources into creating disease-altering therapies for cancers and serious inflammatory conditions. Hundreds of clinical studies around the world use our innovative treatments. ›

Medical Innovation ›
Innovation is at the core of our therapies, turning knowledge about disease mechanisms at the genetic and cellular level into treatments that manage, prevent and ultimately cure illness. ›

Celgene Medical Affairs ›
Celgene Medical Affairs manages the generation and dissemination of scientific data to ensure the safe and appropriate use of Celgene medicines. ›

Clinical Trials ›
Celgene sponsors dozens of clinical trials that are actively recruiting patients in a wide variety of disease areas. ›

R&D Locations ›
Celgene research facilities around the world enable scientists and physicians to find solutions for managing complex
