

From Our Customers

Just back from viewing the home and taking photos – the dining area light fixture is perfect for this home! What a great find! Thanks much for another beautiful job,

- Debra

Thank you for fixing our parents light pole. It sure helps light up my parents' property.

- Joanne

What our customers are saying about us!

Their work was absolutely amazing!!! My cabinets are beautiful and my pull-outs are the envy of my friends! When one of the doors warped after installation, they replaced it at their cost with no hassle. Carl (my awesome project manager), Dave (his right-hand man and my dog's new best friend), Brent (the master plumber and company president), Mike (the project designer and go-to guy when I wanted to change something--which he NEVER hassled me about!), and all the rest of their amazing crew were a dream to work with. I'd been warned about how difficult and stressful it can be to do a major home remodel, but I was nothing but pleased about their work ethic, quality and their staff. My house was always left in neat condition each day when they left and they always arrived each morning (on time) with a smile and a plan for the day. When I had to leave town for several days midway through the remodel, I knew it would be in good hands. If there were questions, they called and asked. My lovely project manager sent me photos of the work each day to let me know how it was evolving in my absence. Although I admit I went over schedule (half way through the project we had an unexpected setback with the floor having to be replaced) and over budget (that unexpected floor replacement and those lovely pull-outs in almost every cabinet!), I don't hold them responsible and am nothing but satisfied with the end result. I only wish I could attach before and after photos so you could see for yourself! I've already asked for quotes for other home projects on my wish list. When I want something done in my house in the future, they will be the first people I call. Their company is AMAZING!
