Our Services...

Our Services

Over 20 years of experience...

[SITE STUDY or Proposed or Existing Structure 499' AGL or Less](#)

A complete evaluation of the site including;

- The maximum height that does not require Notice to the FAA.
- The maximum height that the FCC does not require notice. (May vary from the FAA)
- The maximum height that will not require an extended study by the FAA.
- The maximum height the FAA will permit at the site.
- Any potential problems created by nearby private use airports and/or heliports.
- AM broadcast station search.
- A determination if marking and/or lighting will be required.

[AREA STUDY or Proposed or Existing Structure 499' AGL or Less Within 1 Mile](#)

Provides an overview of the Airspace for a given site up to 1 mile radius. This will allow you to find a suitable site knowing what restrictions may be present overhead.

[STUDIES Over 500' AGL](#)

[FAA Filing](#)

- 7460-1
- 7460 - 2 Part 1
- 7460 - 2 Part 2

[Follow-up Studies](#)

Once a site is selected within a search area, we will evaluate that location and file with the FAA. Assistance will be provided for your site until a determination is received.

[More Services and FAA Form Filings:](#)

Our Experience

Can't find it here, then give us a call...

ASAC has been in the business of airspace development and obstruction evaluation for over 20 years. During this time, we have worked for various government and private industry entities. Additionally, we have a retired Air Traffic controller on staff that has many contacts within the FAA...
