URIMAT[®]
...the waterless urinal

*Every drop
counts....*

...approximately 71% of the earth's surface is covered by water.
Only 0,3% of the total water is available as potential drinking water in rivers, lakes and ground water.

Water is life.

Success through innovation

URIMAT 10 years experience in water and chemical free Urinals

Modern water saving technology can today no longer be dismissed in the commercial as well as the public sanitary sector.

The company URIMAT AG is a global solution provider for innovative water saving technology and biological cleaning concepts. The water and chemical free urinal from URIMAT combines ecology and economy in an impressive fashion. With patented water saving solutions and integrated communication technology URIMAT sets new standards in the sanitary industry.

URIMAT bowls are made from a High-Tech Material (Polycarbonate/Makrolon) and are produced in a CO² neutral manufacturing process.

The pore free surface prevents depositing and the development of odours. The special bowl shape (patented) is also splash reducing, which leads to a reduction in the soiling of the environment.

One URIMAT bowl can save more than 100,000 litres of valuable drinking water annually.

Depending to the region this amounts between €450.-- and €1,200.--.

Our continuous striving for new solutions to protect the resource water has been valued over the previous years by winning numerous internationally important environmental awards.

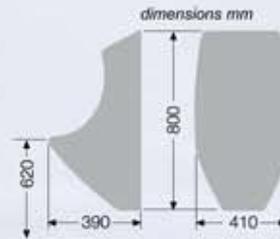

Drain trap with hydrostatic float

The patented and exchangeable odour trap insert (siphon) used in the URIMAT takes up the urine and drains it into the sewage system (without using any water).

Art.-No. 12.201

The hydrostatic float seals the insert (without sealing liquid) and prevents odours from developing.

Micro-biological cleaning system ...sustainable and environmental friendly

Micro-biological and odour destructive

The cleaner removes unpleasant odours, which occur through the decomposition of organic materials. It is especially suitable for the maintenance cleaning in heavily utilized sanitary areas. The micro-organisms force their way deep into the pores (joints) and decompose odour forming residues. The MB-ActiveCleaner ensures that a lasting pleasant freshness remains and prevents renewed odour development when utilized on a daily basis.

We recommend the cleaner for the maintenance cleaning of the urinal.

Application areas:

- Toilets
- Sanitary rooms
- Showers
- Washing rooms
- Facades
- Passages
- Subways
- Stairways
- Waste material container
- Flooring
- Carpeting

MB ActiveCleaner with Kalkex

Chemical free - 100% biological

MB ActiveCube

The micro-biological ActiveCube lowers the build-up of scaling in the odour trap, as well as in the waste pipe and has an odour destructive effect.

After the pipes got cleaned, the MB-ActiveCube significantly reduces the development of scale in the pipes and around the odour trap.

Properties:

With regular application, the microorganisms significantly reduce encrustations and soften scale deposits, keeping the odour trap and the soil pipes free permanently.

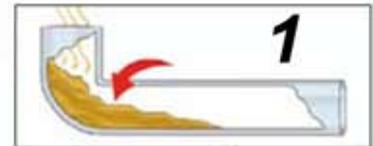

Unpleasant smells are simply broken down.

Contents:

bacteria, block polymers, perfumes.

Environmental features:

Not hazardous for humans or animals. Marine animals are not affected. Compatible with sewage treatment plants.

Deposits and encrustations caused by hair, organic material, oil, fats etc.

The microorganisms in the MB-ActiveCube penetrate the deposits and encrustations...

...simply break them down, soften them up and will be washed away by urine or water.

With continuous utilization of the MB-ActiveCube maintenance and cleaning costs will be reduced.

World Innovation! URIMAT MB-ActiveTrap

Odour trap unit with horizontal membrane technology

Worldwide patented

Patented Three-Way-Control

The efficiency factor of the integrated MB-ActiveCube can be influenced with the patented Three-Way-Control on the cover hood. The Three-Way-Control optimizes the durability of the MB-ActiveCube.

Integrated MB-ActiveCube

The integrated micro-biological MB-ActiveCube improves the hygiene and reduces depositing, crust formation caused by organic materials, oils and fats on the insides of the odour trap as well as in the drainage pipe.

Lifecycle Indicator

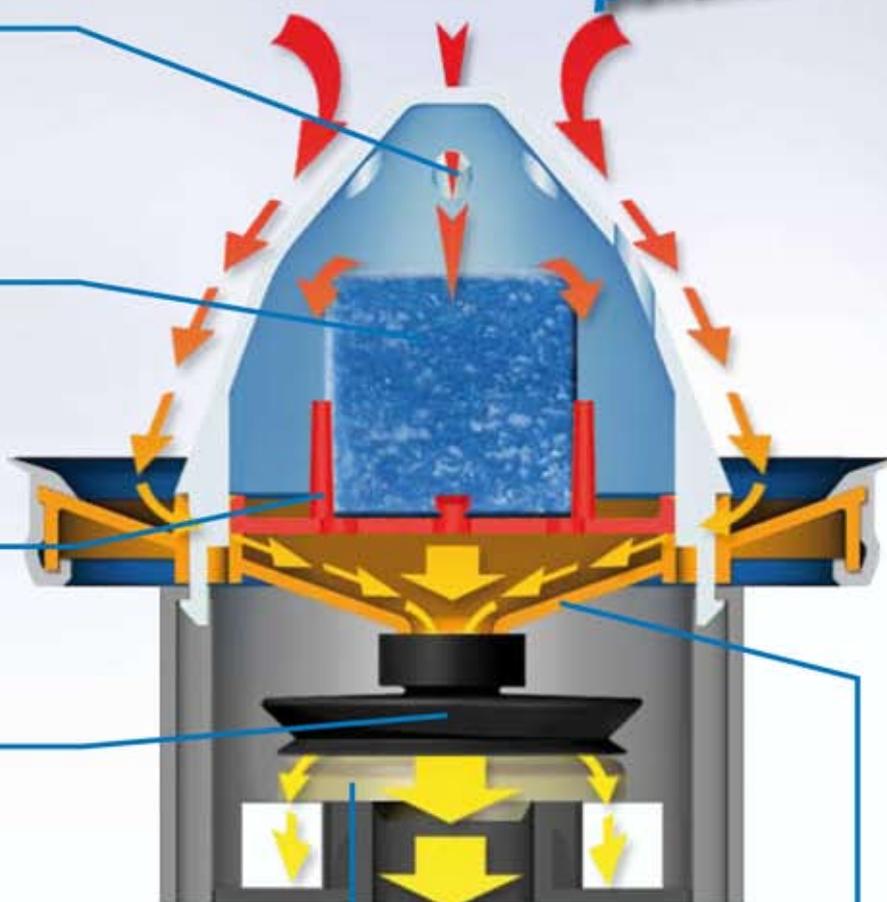

After decomposition of the MB-ActiveCube the red surface area underneath the transparent cover hood signals that the odour trap must be replaced.

Horizontal Membrane System

The horizontal designed membrane technology guarantees absolute odour free operation. The silicon free membrane system ensures pressure resistance. Low pressure in the drainage system is automatically equalized through the membrane. In case of over pressure the horizontally sealing membrane blocks any air seepage of sewerage gases. The membrane always automatically closes airtight through its own weight and guarantees an odour free operation of water-free urinals.

Function description

Urine is drained off into the odour trap and pushes the horizontally closing membrane upwards. The urine flows through the membrane into the sewage system. The membrane lowers itself onto the support area and avoids any developments of odours.

Support area

Funnel shaped inlet

Transparent cover hood

Rubber seal

Odour trap body

With its horizontally closing membrane and the integrated MB-ActiveCube URIMAT offers an odour sealing system that exceeds all requirements of modern sanitary technology. With this new technology problems found in the drainage sector will be sustainably solved.

Another kind of advertising platform ...with video technology

The water free urinal from URIMAT with integrated media panel is unique and unbeatable in its advertising effectiveness. For years now advertising messages have been targeted towards millions of users through the innovative media.

In a continuously changing media landscape it is a natural consequence that URIMAT has now launched a new way of advertising broadcast. By utilization of state of the art video technology moving pictures and information can now be displayed over the URIMAT media platform. A 7" LCD monitor with integrated storage (2GB), data such as videos, advertising spots and other information can be displayed through USB sticks or a VGA port..

The URIMAT video module can be installed into the URIMAT ecoplus and URIMAT compactplus.

Video technology

Technical data:

7" LCD display
Luminosity 300cd/m2
Integrated storage - 2GB
USB port
VGA port
Loudspeaker output

The video module is supplied without loudspeakers.

URIMAT compactvideo

Colour: White
Weight: 5.2 kg
Art.-or. 14.971

URIMAT ecovideo

Colour: White
Weight: 5.7 kg
Art.-No. 16.971

The integrated advertising display

The integrated advertising display is offered in different options. The models ecoplus and compactplus have a passive display without electricity.

The models ecoinfo and compactinfo are equipped with a radar steered LED illumination and the models ecovideo and compactvideo include an integrated 7" LCD monitor to play moving pictures, spots and videos.

With the interactive radar technology for the LED version and the new video technology, advertising effectiveness is increased enormously. Additional revenues can be generated by renting out the integrated advertising space.

Everything counts for URIMAT

- no water – no urine scale
- no chemicals
- low – and over pressure resistant
- no development of odours
- no flushing device required

- absolute hygiene – touch free
- easy assembly/conversion
- simple maintenance cleaning
- extremely lightweight
- break resistant

- proven and tested (thousands of installations worldwide)
- unique – with advertising display
- CO2 neutral manufacturing

WES-1000 Waterfree Urinal

The new wall-hung Sloan WES-1000 Waterfree Urinal with wall outlet saves you water and money. The WES-1000 eliminates water and sewer costs from urinals; reduces maintenance and repair bills; and creates hygienic, odor-free restrooms.

Features and Benefits:

- Touch-free operation
- Uses no water
- Patented, Sealed Locking Cartridge
- Smooth, non-porous surfaces
- Reduced water and sewer costs
- Water supply piping not required
- Odor-free
- Vandal resistant
- Require minimal maintenance
- Two Wall Hanger Brackets Included

Dimensions

19 1/4" x 14 3/8" x 26 1/4"

Approximate Weight

65 lbs.

Mounting for ADA Compliance

For lip height of 17", distance from finished floor to drain centerline must be 9"

Maintenance and Cleaning

- **Perform cleaning once a day, or as needed**
- **Remove any litter in the bowl and clear cartridge holes**
- **Use mild disinfectant cleaner on a cloth to wipe the bowl**
- **DO NOT use aggressive/concentrated detergents or any other chemicals**
- **DO NOT dispose of water into the urinal**

Patented Cartridge Sloan Waterfree Urinals

The replaceable and biodegradable, liquid-sealed cartridge filters waste so liquids enter the drain and sediments are collected for disposal when the cartridge is replaced after 6,000 to 7,000 uses. Multiplying each use by 1.6 gallons of water (to compare to low-flow toilets) or by 3.5 (to compare to older units) shows a savings of 9,600 to 24,500 gallons of water.

WES-4000 Waterfree Urinal

WES-4000 Waterfree Urinal

Sloan further broadens its Waterfree Urinal offer with the new wall-hung Sloan WES-4000 Waterfree Urinal. This new compact, stylish urinal utilizes the same time tested Waterfree Technology that has saved millions of gallons of water across the country and around the world. The new WES-4000 is an attractive option that fits both your design and your budget.

Features and Benefits:

- Touch-free operation
- Uses no water
- Patented, Sealed Locking Cartridge
- Smooth, non-porous surfaces
- Reduced water and sewer costs
- Water supply piping not required
- Odor-free
- Vandal resistant
- Reduced size makes for easy cleaning
- One-piece wall bracket with anchors included

Dimensions

22 3/8" x 15 3/8" x 14"

Approximate Weight

35 lbs.

Mounting for ADA Compliance

For lip height of 17", distance from finished floor to drain centerline must be 10"

WES-5000 Waterfree Urinal

WES-5000 Waterfree Urinal

Sloan further broadens its Waterfree Urinal offer with the new Sloan WES-5000 Waterfree Urinal. The new WES-5000 has a compact design which makes it ideal for new construction or in areas where space is at a premium. This new urinal utilizes the same time tested Waterfree Technology that has saved millions of gallons of water across the country and around the world. The new WES-5000 is an attractive option that fits both your design and your budget.

Features and Benefits:

- Touch-free operation
- Uses no water
- Patented, Sealed Locking Cartridge
- Smooth, non-porous surfaces
- Reduced water and sewer costs
- Water supply piping not required
- Odor-free
- Vandal resistant
- Reduced size makes for easy cleaning
- One-piece wall bracket with anchors included

Dimensions

19 5/8" x 13" x 14"

Approximate Weight
27 lbs.

Mounting for ADA Compliance

For lip height of 17", distance from finished floor to drain centerline must be 9 3/4"

EcoTrap®

Our patented EcoTrap® relies on the proven and simple vertical trap principle.

1. Urine flows down into the EcoTrap® drain insert.
2. In the EcoTrap® the urine passes through a floating layer of BlueSeal® liquid, which forms a barrier that prevents sewer vapors from escaping to the restroom atmosphere.
3. Urine under the barrier layer overflows into the central tube and runs down to the conventional drain line.
4. The layer of approx. 3 ounces of BlueSeal® will last for about 1500 sanitary uses. The liquid is then simply replenished. Task time: 20 seconds. Trap does not need to be touched.

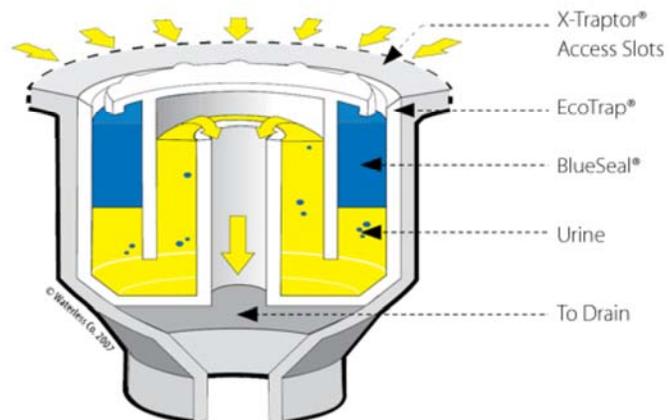

5. The EcoTrap® retains urine sediments and is easily replaced 2-4 times a year according to traffic to the fixture. A special tool, the X-Traptor®, is used to remove the EcoTrap®. This deters vandalism. Task time: 3-4 minutes.

Please see our simple [maintenance instructions](#) here.

6. Drain lines are free of hard encrustations. They are easily accessed by removing the EcoTrap® with the special X-Traptor® tool.

The patented vertical EcoTrap® design provides superior efficiencies to other, more complicated trap arrangements. It does not need to be cleaned out as it is simply changed out. It also helps retain urine sediments. Urinals without trap inserts may clog the urinal's internal trapway.

WATERFREE URINAL
VITREOUS CHINA

Falcon waterfree urinals reduce water and sewer costs, maintenance and repair bills, and create more hygienic, odor-free restrooms. A patented, sealed cartridge eliminates the need for water, conserving an average of 40,000 gallons per unit each year. Purchasing and installing Falcon waterfree urinals is less expensive than manual and automatic flush units because flush valves and associated piping are not required. Maintenance costs and vandalism problems associated with flush valves are also eliminated.

Patented, sealed cartridge uses a biodegradable sealant liquid to control odors.

FEATURES

BENEFITS

• Touch-free operation	• Improved hygiene and safety
• Uses no water	• Reduced water and sewer costs
• Mechanical-free design	• No costly flush valve or sensor repairs
• Patented, sealed locking cartridge	• Odor-free and vandal proof
• Maintenance-free cartridge	• No need to replenish sealant between changes
• Smooth, non-porous surfaces	• Minimal care and easy cleaning
• Vitreous china bowl	• Unsurpassed durability
• Small size	• Ideal for limited space installations

F-5000

WATERFREE URINAL VITREOUS CHINA

INCLUDES

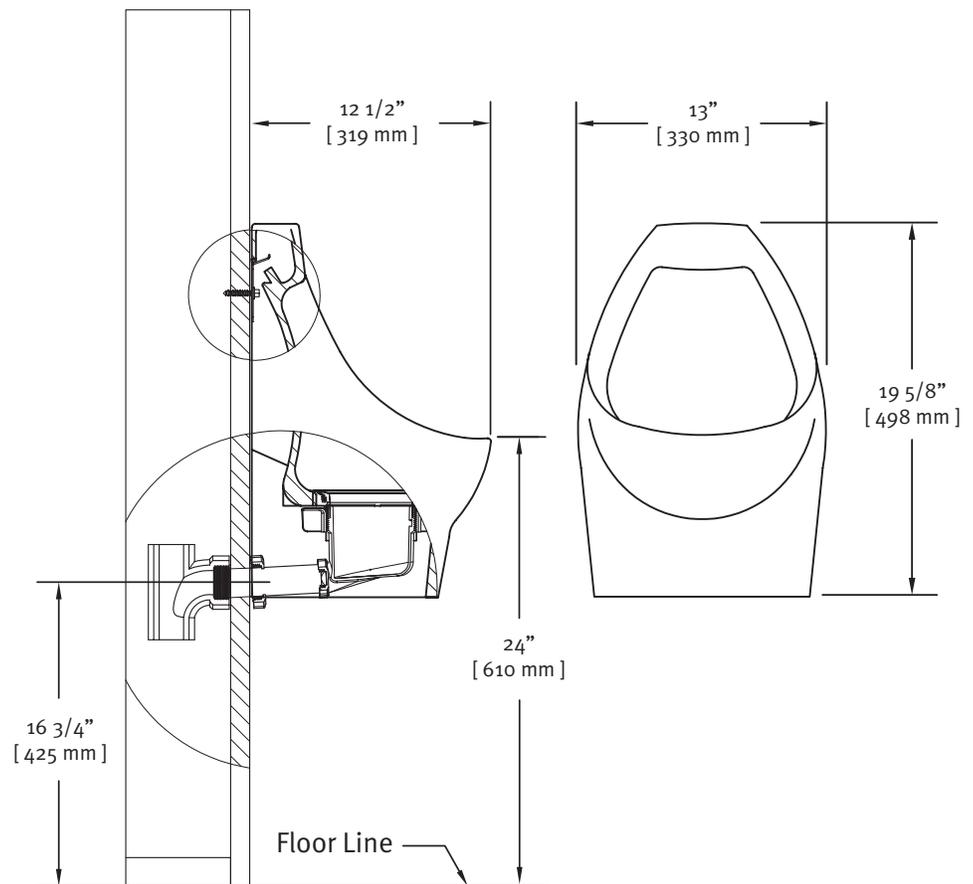

- Cartridge housing (pre-installed)
- Cartridge kit (includes one cartridge)
- One-piece wall bracket with anchors
- Uni-coupler (adaptive waste line coupler)
- Drain line test cap
- Installation instructions

CARTRIDGE KITS INCLUDE

- Sealed cartridge
- Diverter shield
- Plastic installation key
- Pre-measured liquid sealant pack
- Disposal bag
- Plastic glove
- Instruction sheet

ALSO AVAILABLE

- Cartridges in economical 20-packs and 32 cartridge cases
- Heavy duty professional key for cartridge changes

These dimensions are for informational purposes only. For specific rough-in dimensions, please refer to specification sheets available on our web site or contact us directly.

COMPLIANCE CERTIFICATIONS:

Meets ANSI/ASME A112.19.19-2006 for vitreous china non-water urinals.

Meets the American Disabilities Act guidelines and ANSI A117.1 accessible and usable buildings and Facilities. Check local codes.
