## Services

TrapWire offers a wide array of services that can be employed in conjunction with a TrapWire deployment or acquired independently.

- **TrapWire** offers a wide array of services that can be employed in conjunction with a TrapWire system deployment or acquired independently.
- **Training.** Specialized training programs designed to support TrapWire system implementation efforts and/or improve overall security effectiveness.
- **Site Assessments.** Each TrapWire system deployment is preceded by an extensive site assessment conducted by experts in the areas of terrorist target assessment, information acquisition methodologies, and surveillance techniques.
- **Camera Coverage Assessments.** TrapWire offers a camera placement study and recommendations as a supplement to the Site Assessment program.
- **Integration.** Combining the TrapWire system with existing technologies.
- **Red Teams.** Mock pre-attack surveillance activity to test current or post-TrapWire deployment detection procedures.
- **Support.** Customer support programs to help our customers maximize the effectiveness of their TrapWire deployment.
