What's This?

Membership

The Mission of the Therapeutic Touch International Association, Inc (TTIA) is to: Lead, inspire, and advance Therapeutic Touch® as healing practice and lifestyle.

TTIA Vision

We believe healing is an innate human potential. Our vision is for world-wide healing through expanded awareness and access to Therapeutic Touch® as a process which potentiates healing.

Therapeutic Touch International Association, Inc.

- is an international network of members interested in Therapeutic Touch® and healing. We facilitate the exchange of research findings, teaching strategies, and new developments in the area of Therapeutic Touch®.
- was established in 1977 under the leadership of Dolores Krieger PhD, RN.
- is a voluntary, not-for-profit organization. Membership and contributions are tax deductible.
- helps develop satellite groups, workshops, conferences and public relations material on Therapeutic Touch.
- is the principal clearing house for information on Therapeutic Touch®.
- is the membership arm of NHPAI, Inc., the credentialing body for Qualified TT Teachers and Practitioners.

Benefits of Membership in TTIA

- Enables networking with peers and like-minded spirits
- Provides a code of ethics
- Provides policies and procedures to help you implement TT into hospitals/health care facilities
- Provides a forum for discussion of current research into the benefits of TT
- Provides for members access to our on-line directory of members, our bibliography, and our newsletter
- Provides discounts on regional, national, and international TTIA conferences
- Provides teaching guidelines
- Provides support for members working on the credentialing process
- Connects mentors with those wanting mentors

Therapeutic Touch ®

- is an intentionally directed process of energy exchange during which the practitioner uses the hands as a focus to facilitate the healing process.
- was developed in the early 1970s through the pioneering work of Dr. Dolores Krieger, now Professor Emerita of New York University, and Dora Van Gelder Kunz, a natural healer.
- is a scientifically based intervention, practiced in major hospitals and universities.
- is based on the idea that human beings are energy in the form of a field. In health, the field is balanced. In contrast, disease is a condition of energy imbalance or disorder.
- promotes relaxation, alters the perception of pain, and mobilizes the individual's own healing energies.
