Industry News: Motorsports Southwest Becomes Wolf Racing Cars Dealer & Distributor

Motorsports Southwest, LLC is pleased to announce that it is now the exclusive North American dealer and distributor of Wolf Racing Cars.

The Wolf Racing Cars chassis will now be available in North America via Motorsports Southwest (Photo: SPEED EuroSeries)

Motorsports Southwest decided after a factory visit in brescia, Italy

this past September to represent Wolf Racing Cars based on its winning record, impressive Italian craftsmanship and design, and customer support focus of the Wolf Team. From the CF chassis built by the same company that makes the Dallara and Pagani tubs, to the mil/aero spec wiring and connectors, all design choices, materials and components are the best in class.

Interested customers have the option to book a Wolf GB08 test/demo session in the US or a test/demo session can be booked in Brescia, Italy, at the factory test track.

The Wolf GB08 is a high quality high performance CN car that dominated the SPEED EuroSeries in 2012, and has a very successful record of pole positions and wins.

Wolf factory driver Ivan Bellarosa won the 2012 SPEED EuroSeries, and will be driving in the famed 24 Rolex at Daytona race in a DP car as the prize for winning the series and the Sunoco Daytona Challenge.

The Wolf sports racer is a carbon fiber tub chassis using a Honda K20 engine and a Sadev SLR82 sequential transaxle. The car uses the latest state of the art suspension and aero designs, contributing to its success in the European endurance series.

The chassis is also available with a V8 engine making 480 HP, and can also be fitted with a V6 engine or a 330 HP Honda K20.

As a result of the new Wolf Racing Cars partnership, MSSW now offers three related lines of products and services.

Sales and support of Wolf Racing Cars and related products, this includes an Arrive and Drive program.

CN and sports racer brokerage service to provide a second price tier for those interested in CN/SR cars. With relationships with European manufacturers and access to used cars in Europe or the US. Motorsports Southwest can locate good quality used CN/Sports Racers, perform physical Inspection and audit of the cars in Europe, organize hassle-free purchase and import, and repairs or upgrade used cars to bring the cars up to current spec levels.

A partner with SSA-Houston, MSSW also offers new engines built to spec for sports racers and other chassis, and can upgrade and refresh engines. As an example, the organization can build a 300 HP K20 or upgrade an existing K20 to 270, 280, or 300 HP. They can also port and balanced and blueprint almost any engine.

Motorsports Southwest are excited about the partnership with Wolf Racing Cars, and welcome inquiries about the Wolf, its used SR program, and high quality race engines.
