

Windows Internet Explorer browser window showing the Stericycle website. The address bar displays <http://www.stericycle.com/bio-hazard-mailback-disposal>. The page title is "Sharps Mailback | Biohazard Mailback | Medical Waste Disposal Mailback".

The website header includes the Stericycle logo and tagline "Protecting People. Reducing Risk." with a "START NEW SERVICE" button and a search bar.

The navigation menu includes: ABOUT US, SERVICES, BLOG, GLOBAL, INVESTORS, CAREERS, CONTACT US.

The breadcrumb trail is: Home > Services > Containers, Mailback & Products > Mailback Systems.

The main content area features a large image of two men working with a device. Below the image is the heading "Professional Sharps and Medical Waste Mailback Systems" with a rating of +1 and 0 reviews.

The text below the heading reads: "If you generate a small amount of biohazardous waste, such as sharps or 'soft' medical waste, Stericycle offers mailback program systems for your facility."

A button labeled "See Other Services" is located on the left side of the page.

The footer of the page includes the text "Consider Sharps Disposal by Mail".

The Windows taskbar at the bottom shows the Start button, several open applications (Inbox - Mailbox - Rios..., Document1 - Microsof..., Sharps Mailback | Bio...), and the system tray with the time 8:46 AM.

Consider Sharps Disposal by Mail

If you generate only a small volume of used sharps, our professional sharps mailback program may be the right solution for your needs. Our professional sharps mailback solutions are perfect for handling needles, lancets, syringes, and other sharps.

For professionals in medical and dental offices, healthcare clinics, laboratories, businesses, and others who generate larger volumes of used needles, lancets, syringes, or other sharps, we offer a complete line of sharps disposal containers and we offer [pick-up service](#) for collection, treatment, and disposal of sharps.

Press the "Easy" Button With Stericycle Mailback Kits

These convenient, all-in-one mailback solutions for sharps disposal include:

- Sharps container
- Plastic liner
- Tracking documents from origin to final disposal
- Postage-paid return shipping container
- Detailed instructions

Proof of proper disposal is provided via manifest (return shipping documents) following destruction. These mailback disposal kits meet all US Postal Service and US Department of Transportation (DOT) regulations for packaging, labels, and documentation.

Offer Our Easy-to-Use Home Sharps Mailback Program to Your Patients

Each year 8 million people use needles and syringes to manage medical conditions at home. If your patients are looking for a safe home sharps disposal service, be sure to tell them about our [home sharps container mailback](#).

Consider Professional Medical Waste Mailback Disposal

If your organization disposes only small amounts of medical waste, Stericycle "soft" medical waste mailback kits are an excellent and compliant solution.

Standards for separating, packaging, and labeling your regulated medical waste, as well as exemptions

Windows Internet Explorer window showing the Stericycle website. The browser title is "Sharps Mailback | Biohazard Mailback | Medical Waste Disposal Mailback - Windows Internet Explorer". The address bar shows "http://www.stericycle.com/bio-hazard-mailback-disposal".

Standards for separating, packaging, and labeling your regulated medical waste, as well as exemptions based on the amount of waste produced each month, may exist for your state. Please review your state regulations or talk to your Stericycle representative.

Convenient All-in-One Soft Medical Waste Mailback Components

Medical waste disposal kits include:

- Medical waste container
- Plastic liner
- Tracking documents from origin to final disposal
- Postage-paid return shipping container
- Detailed instructions

Be Confident in Our Containers and Tracking Documents

You can be confident that our Stericycle mailback containers have passed rigorous testing standards to comply with US Postal Service (USPS) guidelines and other federal regulations. The programs use specially designed, prepaid shipping containers that comply with the American Dental Association (ADA), Occupational Safety and Health Administration (OSHA), Food and Drug Administration (FDA), and Environmental Protection Agency (EPA) requirements.

We provide you with convenient-to-use mailback containers and all necessary documentation. You or your staff members simply follow the mailback system directions.

Emergency Response and Employee Training

DOT regulations require employee training when preparing hazardous materials such as regulated waste material for transport.

Current mailback customers can find their personal online waste management training at MyStericycle.com.
