FOR HOSPITALS

[Click here for more information](#)

Our Healthcare Compliance Specialists are uniquely qualified to offer acute care hospitals safety and compliance training for their staffs. We use robust tools to execute waste audits and implement training programs to deliver positive outcomes for you. This includes programs to help customers identify, handle and segregate their medical waste, reducing the amount of medical waste they pay to manage, and comply with Dept of Transportation regulations, and pharmaceutical waste compliance programs. To learn more about our training programs for hospitals, [click here](#).

FOR SMALLER HEALTHCARE FACILITIES

As part of our Stericycle Steri-Safe OSHA Compliance Program, we will send one of our OSHA qualified training specialists to your facility. They will provide on-site bloodborne pathogen training, OSHA compliance and safety training for your staff. They will also conduct a mock OSHA inspection, helping you prepare for a real OSHA inspection. To learn more about the Stericycle Steri-Safe OSHA Compliance Program, [click here](#).

Additional Services

[Sharps Disposal Management](#)

Expert collection and processing that reduces the risk of needle sticks and is environmentally friendly.

Steri-Safe OSHA Compliance Program

Training, consulting, site audits -- everything you need to keep your staff safe and achieve compliance.

Rx Waste Disposal

Hazardous and non-hazardous pharmaceutical waste disposal for both large and small medical facilities.

Integrated Waste Stream Solutions

A customized turnkey solution to minimize all waste streams.
